Executive Summary
- Simultaneously managing multiple projects with minimum direction and maintaining accuracy under pressure
- Contributed to product development & product roadmap planning
- Defined architecture of new IOS Apps and developed them broadly from engineering and coding features to polishing user interfaces
- Knowledge of UI design principles, patterns and practices
- Self-starter with a strong work ethic and a passion for problem-solving
- English – Upper Intermediate, Russian – Fluent, Belarusian - Advanced

Professional Experience: Independent Developer, 2021 – till now
- Performed technical designs and implementations of IOS Apps with user-friendly and intuitive interface
- Improved product quality through code reviews, writing effective unit tests and collaborating with QA on implementing automation testing
- Created my own application called "Mobile Wallet" to track finances. Therefore, I've operated with Core Data, obtained data from the server and upload it to the TableView
- Experienced in Cocoapods, Alamofire and SwiftGen, three screens are created using storyboard, two screens are written in code
- Gathering functional requirements, developing technical specifications and project test & planning

IOS-Developer intern at Softteco, Minsk, 01.12.2021-28.12.2021
- Completed commercial projects
- Managed team working skills by participating in groups to create Apps
- Learnt to read any code in existing code-base and change it
- Collaborated in multi-functional tasks and worked under pressure

IOS-Developer at 365scores, Tel-Aviv, 10.01.2022-05.05.2022
- Working with Restful APIs, Core Data and GCD
- Making WatchOS App with SwiftUI
- Testing and debugging mobile application
- Work to expand/improve on an ongoing basis by adding new functionality and resolving existing issues

Education:
Programming School 'Teach me skills', Minsk – IOS Developer, 19.07.2021 - 23.12.2021
Veterinary university, Minsk – veterinary paramedic, 01.09.2018 - 24.04.2021

Technical Skills:
- Programming Language: Swift
- API/frameworks: Alamofire, SwiftyJSON, SwiftUI
- Databases: CoreData, REALM, Firebase
- Architectures: MVP, MVVM, MVC
- Technologies: Autolayout, REST API, SOLID, GIT
