Frontend Developer/ Full stack Developer

An energetic, motivated and responsible young developer. I enjoy learning new technologies and want to improve my skills that I acquired at university and studied independently and grow as a developer. Now I'm developing on React.js/Node.js. I graduated from Art School, like design and my creativity helps me in front-end development, and I would like to use it in my work.

Technologies: React.js, Redux, Node.js, Express.js, JavaScript, HTML, CSS, SCSS, MongoDB, Java, Spring Boot, Spring MVC, OOP, Hibernate, Bootstrap, PostgreSQL, SQL, Git.

Experience

12.2020 – 04.2021 «Gold ventures investment» Israel, Java software developer

Technologies: Java, Spring Boot, Spring Data JPA, Spring Security, Spring MVC, Hibernate, Maven, Thymeleaf, HTML, CSS, Bootstrap, PostgreSQL, Debian, GitHub.

Responsibilities:
- Develop database structure, develop backend on Spring Boot/MVC/Security/JPA
- Develop frontend with Thymeleaf, HTML and Bootstrap, Deploy project
- Group management

Key Achievements:
I worked as a team leader, developed a working application, and deployed it to a web server.

07.2016 – 07.2018 «Neolines», Frontend developer

Technologies: Drupal, Photoshop, Bootstrap, HTML, CSS.

Responsibilities:
- Develop frontend elements, using HTML, CSS, Photoshop, Bootstrap
- Content management and copywriting, using Drupal 6/7

Key Achievements:
Participated in the development and support of four projects.
